

Video Conference
EU dialogue for the 2021 UN Food
Systems Summit
Meeting with Stakeholders
7 June 2021

Challenges and opportunities related to the development of a policy framework on sustainable food systems

↳ **BLUE FOOD: nutrition and food security, Livelihoods, New economic opportunities, Healty Planet**

Boost nature-positive production: Action area 3.2 Manage sustainably existing food production systems: 3.11 Sustain and Expand Sustainable Resilient Blue Food Production Systems: Emplly newly created analytical tools for national governments to more accurately assess the nutrition and socio-cultural assets and utilities of blue foods resulting in more pro-active usage policies and a greater allocation of resources in support of blue food system with a smaller environmental footprint.

How aquaculture and fisheries can contribute to sustainable food systems

↳ **The shift to sustainable fish and seafood production must also be accellerated (Farm to Fork Strategy)**

Fisheries actions: Step up implementation of CFP – Revision of EU's fisheries control system;

Market actions: Revision of the marketing standards for fisheries products.
